

THANKSGIVING RECYCLING

THANKSGIVING RECYCLING

Thanksgiving kicks off the holiday season and commences the time of family get togethers, shopping and festive decorations. We want you to have fun and be safe during this time, but you can still practice reducing, reusing and recycling.

TIPS

- ♻️ Plan your menu carefully to minimize over cooking and having too much left over. Buy in bulk and reduce packaging.
- ♻️ Use the compost bin for all your fruit and vegetable trimmings and food scraps. Remember that turkey carcasses and bones, gravy, fats, grease and food scraps containing dairy products should not be put in the compost bin.
- ♻️ Shop with reusable bags.
- ♻️ Be sure to recycle your paper, along with the plastic, glass and aluminum containers. Please clean all aluminum roasting pans, pie plates and foil before recycling. Mark recycling bins to help guests.
- ♻️ For your table, use cloth napkins and do your best to stay away from disposable place settings and plates. Make sure the dishwasher is completely full before running.
- ♻️ Travel smart and car pool to reduce the number of cars on the road.
- ♻️ Invite the neighbors and have fun. Get outside and enjoy the fresh air.
